# Help End Hunger

## The 2016-2017 Governor's Project

Hello Capital District,

Help End Hunger is the name of My Governor's project; a program that helps those who are cannot nourish themselves in your neighborhoods and communities. Approximately 16 million children in America are malnourished, with my project I anticipate that those children and families are able to find their next meal. I hope that all of you are able to participate in my project this upcoming year and feed the less fortunate.

Daniel Inglis, Capital District Governor

### Rules

There is only one rule that you have to follow in executing this project; another member of the K-Family must be involved in the project. By working with your K-Family, you all are able to better understand just how big Kiwanis is and how so many people are dedicated to service.

### Projects Idea

Host or volunteer at a soup kitchen

Host a canned-food drive in your school to donate

Create bagged meals and donate them to a homeless shelter

Help at any local food pantry

Anything that helps those who aren't able to feed themselves.
